Profile Summary

Software Engineer with strong fundamentals in Node.js, Python, MongoDB, and REST APIs. Built production-style backend systems with authentication, role-based access control, and Redis caching, and deployed ML models via Flask APIs.

Skills

- **Languages:** Python, Java, Javascript
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MongoDB, MySQL, Oracle SQL
- **Machine Learning:** TensorFlow, Keras, scikit-learn
- **Tools:** Git, GitHub, Redis
- **Frontend:** React.js, HTML, CSS

PROJECTS

Project Camp — Project Management Backend System | [GitHub Link](#) | *Node.js, Express.js, MongoDB, Redis*

- Built a production-style project management backend using MVC architecture and modular service layers.
- Implemented JWT-based authentication, email verification, password reset, and role-based access control.
- Developed REST APIs for projects, tasks, subtasks, notes, team management with proper validation and error handling.
- Integrated Redis caching to reduce database load and improve API response times.
- Designed MongoDB schemas and implemented file upload support for task attachments.
- Added middleware for authentication, authorization, validation, and centralized error handling.

Dog Breed Classification System | [GitHub Link](#) | *TensorFlow, Keras, Flask*

- Fine-tuned Xception, Inception, and DenseNet models using transfer learning on the Stanford Dogs dataset.
- Built an ensemble inference pipeline to improve prediction robustness and overall accuracy.
- Implemented a complete training, evaluation, and validation pipeline using accuracy, F1-score, and confusion matrix.
- Deployed the model using a Flask API that accepts image uploads and returns predicted dog breeds.

Aptitude Buddy — Android App | *Flutter, Dart, Google AdMob*

- Designed and developed an Android application for aptitude preparation with topic-wise questions categorized by Easy, Medium, and Hard levels, a quiz mode, and integrated Google AdMob for monetization.
- Conducted closed testing via Google Play Console in Dec 2023, collected user feedback, and iterated on UX and features. Published the app on Google Play Store under my own developer account on Jan 1, 2024
- Maintained and supported the application for over 1 year in production before removing it from the Play Store due to developer subscription non-renewal.

EXPERIENCE

360DigiTMG — Data Analyst Intern | Feb 2024 – Apr 2024

- Performed exploratory data analysis (EDA) and built visualizations using Matplotlib and Seaborn.
- Analyzed user behavior data to identify website bounce-rate patterns.
- Delivered insights that helped guide data-driven UI/UX improvement decisions.

Slashmark — Machine Learning Intern | Dec 2023 – Feb 2024

- Built and evaluated ML models using scikit-learn for regression, classification, and clustering tasks.
- Implemented Linear Regression, Logistic Regression, and K-Means clustering on structured datasets.
- Evaluated models using accuracy, precision, recall, F1-score, and RMSE.

EDUCATION

B.Tech in Computer Science and Engineering
Narasaraopeta Engineering College, India (2020 – 2024)
CGPA: **7.96**

CERTIFICATIONS

- Machine Learning Specialization — Coursera (Andrew Ng)
- Supervised Machine Learning: Regression and Classification — Coursera
- Advanced Learning Algorithms — Coursera
- Unsupervised Learning, Recommenders, Reinforcement Learning — Coursera
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Power Platform Fundamentals
- The Joy of Computing using Python — NPTEL
- Database Programming with SQL — Oracle
